Author Index Volume 62 (1991)

Alekperova, N.M., 1

Bertóti, I., 201
Bhattacharyya, D., 325
Bhide, B.D., 13, 37
Blokhra, R.L., 211
Bromberg, L.E., 117, 131, 145, 155
Brose, D., 347

Cipriano, M.M., 103
Cussler, E.L., 371

Da Costa, A.R., 275
Davis, R.H., 249

Fane, A.G., 275
Fell, C.J.D., 275
Franken, A.C.M., 275
Friesen, D., 347

Geraldes, V., 103
Gooding, C.H., 309
Guha, A.K., 293

Han, M.J., 325
Hawes, C.R., 87
Hegyi, M., 201
Huang, R.Y.M., 59

Iritani, E., 187

Kano, K., 187
Kawabata, N., 219
Keszler, B., 201
Khajuria, M., 211
Kovács, G., 201
Kurenbin, O.I., 1

Majumdar, S., 293
McCray, S., 347
Murase, T., 187

Newbold, D., 347
Norberta de Pinho, M., 103

Pradistsuwana, C., 187

Ray, R., 236, 347
Reed, I.M., 87
Robeson, L.M., 165
Romero, C.A., 249

Semmens, M.J., 371
Sheldon, J.M., 75, 87
Sirkar, K.K., 293
Slater, S.C., 239
Stern, S.A., 13, 37
Sudareva, N.N., 1

Teramoto, M., 219
Tóth, A., 201

Uramoto, H., 219

Wickramasinghe, S.R., 371
Wytcherley, R.W., 347

Yeom, C.K., 59

Subject Index Volume 62 (1991)

antimony oxide membrane, 211

biogas purification, 293
biomedical use, 131
biosensors, 117

cellulose triacetate membrane, 13, 37
ceramic membranes, 187, 249
channel spacer design, 275
composite membranes, 117, 131, 145
coupled transport, 155
crossflow microfiltration, 249
curriculum, 239

diffusion, 249
dynamic microfilter, 187

economics, 13, 37, 275, 371
education, 239
electrochemistry, 145
electron microscopy, 75, 87
environment sensitive membranes, 117

flexible-chain macromolecules, ultrafiltration of, 1
flux decline, 249
fouling, 87

gas diffusivity, 165
gas separations, 13, 37, 165, 239, 293
grafting, modification by, 201

hollow fiber membranes, 371
hollow-fiber-contained liquid membrane, 293
hybrid separation systems, 347
hydrogels, 145
hydrodynamic flow, 211

inorganic membranes, 187
ion-exchange membranes, 145, 155
irradiation, modification by, 201

liquid membranes, 293

mass transfer, 275
membrane extraction, 219
membrane preparation, 131
membrane preparation and characterization, 201
membrane preparation and structure, 325
microfiltration, 187
microporous membrane, 219, 371
microporous polypropylene membrane, 293
model study, 249
modules, 371

non-electrolyte and electrolyte solution, 211

oxygen-enrichment of air, 13, 37

permeability, 165
permeation separation index, 59
pervaporation, 59, 103, 309
pH-sensitive membrane, 117
phenol, removal of, 219
poly(phenylene oxide) membrane, 13, 37
poly(4-vinylpyridine) membrane, 219
poly(vinyl alcohol) membrane, crosslinked, 59
poly(vinyl alcohol)/polyacrylonitrile composite membranes, 103
polyamide/polyethersulfone composite membranes, 103
polyethersulfone membranes, 201
polysulfone membranes, 75, 87
process optimization, 13, 37
process design, 309

regenerated cellulose membranes, 75, 87
reverse osmosis, 103, 239, 309, 325
rotating membranes, 187

separation of acetate acid–water mixtures, 59
separation of amyl alcohol–water mixtures, 103
separation factor, 165
silicone rubber membrane, 13, 37
solubility and partitioning, 325
spacers, 275

theory, 309
theory data analysis, 165

ultrafiltration, 1, 239, 275, 309
ultrafiltration membranes, structure of, 75, 87

water treatment, 325
